ICELAND POPPY—Our Special Strains

MONSTROSA EXHIBITION STRAIN.

This new introduction surpasses all other strains for length of stems and size of flowers, the latter being very large and the stems, besides being of great length up to 3 feet, are proportionally stout. In addition to the older shades, this mixture contains many glorious colour combinations difficult to describe; also self colours in orange, yellow, white, pink, etc. **WHEN IN BLOOM AT OUR "GRENDON" NURSERIES AT BRIGHTON THEY WERE THE CENTRE OF ATTRACTION.** 1/6 pkt.

GRENDON ART SHADES (RE-SELECTED).

With the exception of a possible odd plant or two, this strain does not contain the original colours such as yellow, orange, and white. Plants from the seed offered will produce colours such as cream, sulphur, soft pink, coral pink, rosy, and other shades of pink besides beautiful combinations of delicate shades of colour. Highly recommended.

1/-, and 2/- per pkt.; 4/6 ½ oz.; 8/- ½ oz.

"GARTREF" MIXED.

The "Gartref" strain of Iceland Poppies has been re-selected from the range of art shades, and, as a distinctive feature, most of the blooms have dark edges to the petals, both in dainty tonings and in sharp contrast to the base colourings. 1/- and 1/6 pkt.

Gartref (Regd.), Dark Edged Pink Shades.—Edgings are very distinct, and a large percentage true to colour. 1/- and 1/6 pkt.

Gartref (Regd.), Lustre.—A distinct new range, showing Gartref character. The inner surface of each petal is distinctly deeper in tone than the outer. A shading towards the centre adds to the effect of rich colouring, and zonal rings are evident in some blooms. Colours include soft, rich shades of parchment, cream, biscuit, yellow, pink, salmon, and apricot. The plants bloom even more freely than the Gartref Dark Edged, giving large blooms on erect, long stems. 1/- and 1/6 pkt.

COONARA-PINKS (RE-SELECTED).

This re-selected strain of Coonara Pinks is exceedingly fine. It contains a wonderful range of those delicate shades that appeal so much to the æsthetic taste. The self colours range through all shades of pink, while others contain colour combinations difficult to describe. 6d., 1/-, and 2/- pkt.

Coonara Orange and Gold Shades.—The size of the flowers is only surpassed by our "Monstrosa" Iceland Poppies. The flowers, which range in colours from orange to gold, are produced on exceedingly long strong stems. Many prefer these shades of colour as they show more to advantage in artificial light. 6d. and 1/- pkt.

Grendon Rainbow Mixture.—The fact that this strain contains such a complete range of colours accounts for its great popularity. This is a special blend which comprises the popular art shades, Coonara Pinks, and our improved orange and gold shades. 9d. pkt.

Sunbeam Hybrids.—A re-selected strain, representing a great improvement on the ordinary Iceland Poppies. 2/9 ½ oz.; 6d. pkt.
